3. **Dataset Outline :**

- Dataset Name: USA Accidents
- Dataset Description: This dataset contains various information about road traffic accidents in the United States. Such as:
 - Accident severity
 - Location information
 - Date and time of accident
 - Weather conditions
 - Road and traffic information
 - Twilight conditions
 - etc.

The main purpose of this dataset is to analyze and predict accident severity.

- Number of Records: 10,000
- Number of Features: 46
- Feature Categories:
 - Categorical Features (Label/Type):
 - Source
 - Street
 - City
 - County
 - State
 - Country
 - Timezone
 - Airport_Code
 - Wind_Direction
 - Weather_Condition
 - Sunrise_Sunset
 - Civil_Twilight
 - Nautical_Twilight
 - Astronomical_Twilight

Numerical Features (Number):

- Start_Lat
 - Start_Lng
 - End_Lat
 - End_Lng
 - Distance(mi)
 - Temperature(F)
 - Wind_Chill(F)
 - Humidity(%)
 - Pressure(in)
 - Visibility(mi)
 - Wind_Speed(mph)
 - Precipitation(in)
-
- Target Variable: Severity
